

What kind of plant do I have?

- Fern or Moss (never have flowers)
- Annual Herb (dies back every year)
- Perennial Herb (almost or never dies back)
- Bush or Shrub (woody stems)
- Tree (usually a wood main stem/trunk and branches)

Plants and animals go together

Native Plants

A Native plant is a plant that has been growing **naturally** in an **environment** for a very long time.

Because of that it fits into the **ecology** of that environment. Supporting and being supported by the other native **organisms** in that environment.

What are 2 things that plants make that we can't live without?

Some plants have flowers
Some plants have cones
Some plants have neither
What do we call these different types of plants?

"Estimate" the height of your Plant

About 2/3 of 43 inches = 28-3/4 inches 72.6cm
Add Jesse's height = 43 inches 109 cm
The plant is about = 71-3/4 inches 181.6cm

43 inches
109 cm

Smooth

Lobbed

Toothed
