

DESERTS OF CALIFORNIA

BIRDING & NATURAL HISTORY

March 15 - 20, 2027

Wild **LATITUDES**

WORLDWIDE NATURE TOURS

DESERTS of CALIFORNIA

BIRDING & NATURAL HISTORY

Join us on a 6-day journey through the enchanting Sonoran and Mojave deserts of Southern California. Led by naturalist and birding guide Ivan Phillipson, this tour offers a rich exploration of the region's rugged landscapes and arid-adapted animals and plants.

The tour begins and ends in **Palm Springs**, in the **Coachella Valley**. This is the western edge of the Sonoran Desert—a landscape of sand dunes, cacti, dry flood channels, and boulder-strewn slopes. Surrounding the valley are the snow-dusted peaks of several mountain ranges. A fascinating mixture of birds, other vertebrates, insects, and desert plants awaits you in this unique environment.

Our exciting and educational journey will take us to nature hotspots across the Coachella Valley, through **Joshua Tree National Park**, to the shores of the **Salton Sea**, and into **Anza Borrego Desert State Park**. You'll not only see wonderful birds on this trip, but you'll also learn about desert ecosystems and the region's fascinating geology. Several of the most magnificent sites we'll visit are lush desert oases, shaded by native **California Fan Palms**.

Some special birds we hope to find include **Greater Roadrunner**, **Phainopepla**, **Verdin**, **Gambel's Quail**, **Common Ground Dove**, **Ladder-backed Woodpecker**, **Neotropical Cormorant**, **Burrowing Owl**, **Cactus Wren**, **Abert's Towhee**, and **Black-throated Sparrow**.

Ivan grew up in Southern California, and has spent countless days exploring the region's deserts. He's excited to be your guide—to help you enrich your knowledge of the birds, wildlife, plants, and landscapes of the Sonoran and Mojave deserts.

We're opening this tour exclusively to members of the Golden Gate Bird Alliance, so if you're interested, **please contact the GGBA Travel Desk at travelprogram@goldengatebirds.org**

Co-owners and Lead Guides at Wild Latitudes

TRIP DETAILS

Start Date: March 15, 2027

Duration of Tour: 6 days

Number of participants: Max of 8

Fee for Tour: \$2,475 per person

Deposit: \$1,300

Single Supplement: \$685

Trip Leaders: Ivan Phillipson, Zoey Greenburg

Included:

- Double-occupancy lodging
- Ground transportation
- Breakfasts and lunches
- Excursions and park fees
- Guiding services

Not Included:

- Flights
- Dinners
- Alcoholic beverages
- Personal items
- Optional gratuities for guides

ITINERARY

Tentative and subject to change depending on weather, road, or other conditions.

Day 1 - March 15 - Arrival to Palm Springs and Visiting the Thousand Palms Oasis

Welcome to the **Coachella Valley**! Your guide, Ivan Phillipson, will greet you at the Palm Springs Airport. After brief introductions all around, we'll head off to enjoy a delicious lunch in **Palm Springs**. Then we'll check in to our hotel and prepare for our late afternoon outing: exploring the **Thousand Palms Oasis**.

This impressive grove of California Fan Palms is in the **Coachella Valley Preserve**. The palms depend on groundwater forced to the surface here along the San Andreas Fault. The preserve also protects a large area of wind-blown sand habitat, which is crucial for several endangered animals, like the Coachella Valley Fringe-toed Lizard.

Some special birds we hope to see here include **Greater Roadrunner**, **Gambel's Quail**, **Verdin**, **Phainopepla**, and **Black-tailed Gnatcatcher**.

As evening approaches, we'll make our way to dinner, then back to the hotel.

Lodging: [Holiday Inn Express & Suites Rancho Mirage](#)

Day 2 - March 16 - Indian Canyons

We have a full day in the Palm Springs area. After breakfast this morning, we'll head to the **Indian Canyons**, just south of town. There are several beautiful desert canyons. We'll hike through a beautiful desert canyon—sheltering a cold stream and large palm oasis. As always, we'll be looking for birds. Species we may find here include **White-throated Swift**, **Rock Wren**, **Canyon Wren**, **Abert's Towhee**, **Hooded Oriole**, and **Scott's Oriole**.

After a hearty lunch, our afternoon will be flexible. We may hit a local birding spot, or visit the **Agua Caliente Cultural Museum**, to learn about the Cahuilla Indians that have lived in the region for thousands of years.

Ladder-backed Woodpecker

Palm Oasis in the Coachella Valley

We'll go over our bird list before giving you a night on your own to enjoy dinner where you choose. There are several good restaurant options within walking distance of our hotel.

Lodging: [Holiday Inn Express & Suites Rancho Mirage](#)

Day 3 - March 17 - Big Morongo Canyon & Joshua Tree National Park

Heading out right after breakfast and check out, we have a full day of birding and nature exploration ahead of us. Our first stop, where we'll spend the entire morning, is **Big Morongo Canyon Preserve**. This is another oasis, with flowing surface water that supports dense stands of Fremont Cottonwood. The boardwalks and trails here will make our experience more of a pleasant stroll than a hike.

Big Morongo is one of the most diverse bird hotspots in the entire region. Birds are attracted by the tree cover and fresh water. Over 200 species have been seen at the preserve. We'll be on the lookout for birds like **Ladder-backed Woodpecker**, **Vermilion Flycatcher**, **Oak Titmouse**, **California Thrasher**, and **Black-throated Sparrow**.

Next, we'll enjoy picnic lunches, then make our way to the north end of **Joshua Tree National Park**. At this point, we have entered the **Mojave Desert**. Joshua Trees are the iconic plants of this ecoregion. As we drive through the national park, we'll make several stops to take in the scenery and to chat about geology and ecology. Time allowing, we'll do an easy hike (about 1.5 miles; rocks and sandy uneven surface of rocks and sand). The Mojave Desert gives way to the Sonoran Desert as we head south, returning to the Coachella Valley.

We'll fill out our bird and wildlife lists in the evening before enjoying another dinner together.

Lodging: [Holiday Inn Express & Suites Indio](#)

Day 4 - March 18 - The Salton Sea

Checking out of our hotel, we now head southeast, dropping in elevation until we are about 230 feet *below* sea level! Our destination is the north shore of the **Salton Sea**. This large body of water—partially natural, partially man-made—has a long and complicated history. Large numbers of waterbirds and shorebirds, of many species, spend their winters on the Salton Sea. Other species stop here on migration, as they travel along the **Pacific Flyway**.

Birding at several sites along the lake shore, we'll be looking for species like **Surf Scoter**, **Western Grebe**, **Black-necked Stilt**, **Gull-billed Tern**, **Black-bellied Plover**,

DESERTS of CALIFORNIA

March 15-20, 2027

Willet, American White Pelican, White-faced Ibis, Green Heron, Cactus Wren, Abert's Towhee, and Sage Thrasher.

We'll head to dinner after a full day of birding and exploring. Our lodging tonight is just south of the Salton Sea. We're now in the heart of the **Imperial Valley**, a rich agricultural region.

Day 5 - March 19 - The Salton Sea and Anza Borrego Desert

Likely our "birdiest" day! Early this morning, we take a short drive to the south shore of the Salton Sea. Even more bird species and larger flocks are found at this end of the lake. We'll likely see some of the same species as yesterday, but hope to pick up quite a

The Salton Sea

few more. Possibilities include **Snow Goose**, **Common Ground Dove**, **White-faced Ibis**, **Neotropic Cormorant**, **Bell's Vireo**, and **Loggerhead Shrike**. We'll make a special effort to find **Burrowing Owls**, which are fairly common in this area.

We'll return to the hotel to check out. We then hit the road and head east to **Anza Borrego Desert State Park**. Our scenic drive will take us through a beautiful and fascinating desert landscape. We'll stop in several places—to have a picnic lunch, learn about desert plants, look for birds, and enjoy short walks.

We end the day in the small, isolated community of **Borrego Springs**. Looming to the east are the Laguna Mountains. Before dinner, we'll go through our bird and wildlife lists and celebrate the day.

Lodging: [Borrego Springs Resort and Spa](#)

Day 6 - March 20 - Return to Palm Springs and Departures

On our last day, we'll offer an early morning birding option. After brunch at the hotel, our road takes us back north to Palm Springs in the Coachella Valley.

Our adventure ends as we say our goodbyes at the Palm Springs Airport.

IMPORTANT INFORMATION

YOUR GUIDE

IVAN PHILLIPSEN

Ivan is a dedicated naturalist with a background in scientific research. He holds a M.S. in Biology from Cal State San Bernardino and a Ph.D. in Zoology from Oregon State University. As Co-owner of Wild Latitudes, Ivan has been able to apply his knowledge in crafting and leading ecotours around the world.

Natural history is Ivan's true passion and what he is most excited to share with tour participants. Although he is fascinated by just about every aspect of nature, Ivan is particularly fond of birds, reptiles, amphibians, invertebrates, plants, and geology. Everything is interconnected in nature and he does his best to take a holistic approach when teaching about the natural world.

ZOEY GREENBURG

Zoey grew up in Bellingham, Washington, where the Salish Sea and temperate rainforest catalyzed her love of the living world. Along her path she was a deckhand on tall ships in the eastern U.S., a vulture trainer and youth educator at Penn State's nature center, a curriculum writer and science outreach coordinator at Hawk Mountain Sanctuary, a migration counter along a golden eagle flyway in the Appalachians, and a whale watch guide in the San Juan Islands.

Zoey has a B.A in human ecology from the College of the Atlantic in Maine and an M.S. in environmental studies from the University of Montana, where she wrote a thesis of prose poems critiquing conservation ethics. She centers her career around illuminating overlooked corners of the animal kingdom. For this, vultures are her north star.

She is now the science writer for the Journal of Raptor Research, a naturalist and zodiac driver for National Geographic-Lindblad Expeditions, the raptor ecology specialist for HDOnTap, and a facilitator for outdoor writing workshops with Freeflow Institute. She also compiles the North and South American updates for the IUCN's biannual newsletter on global vulture research. Zoey enjoys volleyball, ultimate frisbee, bellydance, and the color turquoise. She oscillates between the Pacific Northwest and the Big Island of Hawai'i.

IMPORTANT INFORMATION

THE PACE AND STYLE OF OUR TOURS

The primary goal of our trips is to experience and learn about the natural world, especially the region's birds and other wildlife, and of course, to have fun! As birding is often a primary focus of our tours, and birds are active in the morning, we will sometimes have early morning outings before breakfast. That said, our style of birding may not be ideal for hard-core "listers." We prefer to spend time observing the species we encounter, and learn a bit about their natural history, rather than rushing through the field to add the maximum number of species to our bird list. We also make diversions for interesting, non-avian wildlife, plants, geological wonders, and cultural activities. The pace of most of our trips is moderate, and we encourage anyone in good health to attend and enjoy the experience. Please contact us about if you need specific information on the types of physical activities on a tour and their physical requirements.

We strive to immerse participants in the local culture and to that end, wherever possible, we stay in locally owned and operated hotels that are designed and run in an environmentally sustainable way. Though some accommodations may be more basic than others, all are safe, clean and comfortable. We also utilize the services of local guides, visit local markets, and other culturally significant sites.

TOUR DATE AND TRIP LEADER CHANGES

Leaders and schedules are determined up to a year in advance of our tours. In the event that we have a change in a tour's dates or leaders, we reserve the right to do so, and will strive to inform participants as early in the process as possible. Additional leaders may be added to tours according to the group size, and will be specified in the tour itinerary. We also reserve the right to cancel any trip for which there are insufficient reservations.

DEPOSIT POLICY

A deposit is due at the time of registration. ***A deposit is the only thing that guarantees your place on the trip.*** Registration can be made over the phone with a credit card: 503-714-3504. *Note:* there is an additional 3.0% fee for credit card payments. This is only what we are charged by the credit card company.

Checks are happily accepted and should be made out to *Wild Latitudes LLC*. Include the tour name on the memo line of the check and send to:

Wild Latitudes, PO Box 25115, Portland, OR 97298.

PAYMENT POLICY

Full payment is required **90 days** prior to the tour departure date for international tours or any tour involving flights; and **30 days** prior to the tour departure date for local (i.e. in the Portland, Oregon area), van-based tours.

IMPORTANT INFORMATION

CANCELLATION POLICY

In the event a participant needs to cancel a reservation for any tour, the following policies will apply:

- **90 days** or more prior to tour departure date, the deposit will be refunded, minus an administrative fee of \$100.
- **Less than 90 days** prior to tour departure date, no refunds will be given.

We *strongly* recommend that you purchase trip cancellation insurance to protect yourself from unforeseen circumstances.

If for any reason Wild Latitudes cancels a tour prior to the start of the tour, full refunds—minus the cost of any internal/in-country airline tickets purchased and/or any non-refundable deposits or expenses already made by Wild Latitudes—will be given to all participants. In the event that the tour is canceled while underway due to unforeseeable events such as but not limited to natural disaster, military activities, social uprising, or other extremely dangerous conditions not within the control of Wild Latitudes, no refund will be issued.
