Keeping the magnificent California condor soaring has been a mission of Ventana Wildlife Society for more than 20 years. VWS currently leads efforts to save the condor by treating them for lead poisoning caused by ingesting carcasses shot with lead bullets. Oakland Zoo is now partnered with Ventana Wildlife Society and the California Condor Recovery Program to medically treat and release wild condors. Come learn how we work together to help these native birds, and how you can take action to help them, as well.

**Members:** \$12-\$20 sliding scale  
Proceeds benefit the  
California Condor Recovery Project
